# POWERSAFE

## PRODUCT SUMMARY

The powersafe system is designed especially for where there is a possibility of primary pump failure through either a pump fault or loss of mains power that would be catastrophic. The powersafe system comprises of a control panel, incorporating a battery to power an additional 24v back-up pump, float switches, non-return valve and an IP66 rated junction box.

- **Control panel with audio and visual high level alarm**
- **Power ensures second and/or third pump assists the first pump in storm conditions**
- **Fully Automatic Operation**
- **Alarm that can be linked to BT/Mobile phones**
- **Easy to install**
- **Batteries with 90 minutes continuous life span**
- **Non-Return Valve preventing back flow**
- **Compact control panel**
- **No gas admission due to the use of Lithium batteries**
